"We hired Breathe –Freedom from Nicotine to help our company, All Around, quit using tobacco and had a 100% success rate. That's right, all 7 of us users gave it up on March 5th, 2014 and are still going strong. I'll be honest that I was a little skeptical at first. I thought there is no way a laser is going to get me to quit smoking, but after the first week of seeing myself and fellow coworkers smoke free, I became a believer. I have already recommended them to my Dentist as a potential referral for their patients and I would urge anyone on the fence about giving this a shot, to just go for it! It may be the best decision you have ever made. "
